Digital Inclusion:
Empower Every Individual 🌐

Create technology-driven solutions that break down digital barriers and make digital services more accessible, inclusive, and user-friendly for everyone.

1
Grandfather Zafar — The Teacher
Grandfather Zafar, who has been a teacher for 40 years, has educated hundreds of students. Today, some of them are doctors, engineers, and specialists creating new technologies.
2
The Digital Barrier
?
Doctor's Appointment
Password
Confirmation Code
Continue
One day, he wants to book a doctor's appointment, but he struggles to understand the app's buttons, passwords, and confirmation codes.
3
The Necessity to Wait
Father, I'm at work now. I'll take a look this evening.
Okay, my child. No rush.
He calls his son asking for help, and as a result, he must wait until the evening.
4
The Solution
hug
"HUG, I want to book a doctor's appointment."
Appointment booked successfully!
Thank you! How can I halp you today?
hug
Top for the weekly schedule
Emergency Call
Now Grandfather Zafar just says, "HUG, I want to book a doctor's appointment" out loud, and HUG helps him.

Problem

Digital Exclusion
Many older adults feel left behind by technology.

Complex Applications
Current apps are hard to use.

Dependence on Others
They often need help from family or caregivers.

& Solution

Voice-Based Access
Simple and natural voice commands.

All-in-One Assistance
Call, order, schedule and more in one place.

Independent Living
Helps older adults manage daily tasks on their own.

Target Audience

Azerbaijan's Population Aged 60+, 2026

Total:
1,668,000 People

Social Impact

HUG is more than a tool — it's a bridge between **technology** and **people**.

Greater Accessibility

Bridging the digital divide for older adults

Enhanced Well-being

Reducing isolation and promoting mental health

A More Inclusive Society

Empowering every individual in the digital age

Benchmark

HUG stands out with a **comprehensive** set of features.

Business Model

Key Partners

- Pharmacy chains
- Care centers
- Clinics
- Wolt and taxi platforms
- Banks and telecom operators

Key Activities

- AI development
- Service integrations
- Pharmacy sales support
- Pilots

Key Resources

- AI and cloud infrastructure
- Mobile application
- Care Dashboard
- Team

Value Propositions

- **For users:** Speak, let the agent do the work
- **For families:** Peace of mind and emergency alerts
- **For care centers:** Unified monitoring dashboard
- **For everyone:** Protection against scam messages

Customer Relationships

- Voice interaction
- Pharmacist recommendations
- Family collaboration
- Monthly subscription

Channels

- Pharmacies (point of sale)
- Care centers
- App stores
- Social campaigns

Customer Segments

- **Users:** Elderly people, people with disabilities, and digitally vulnerable individuals
- **Payers:** Families, care centers, and clinics

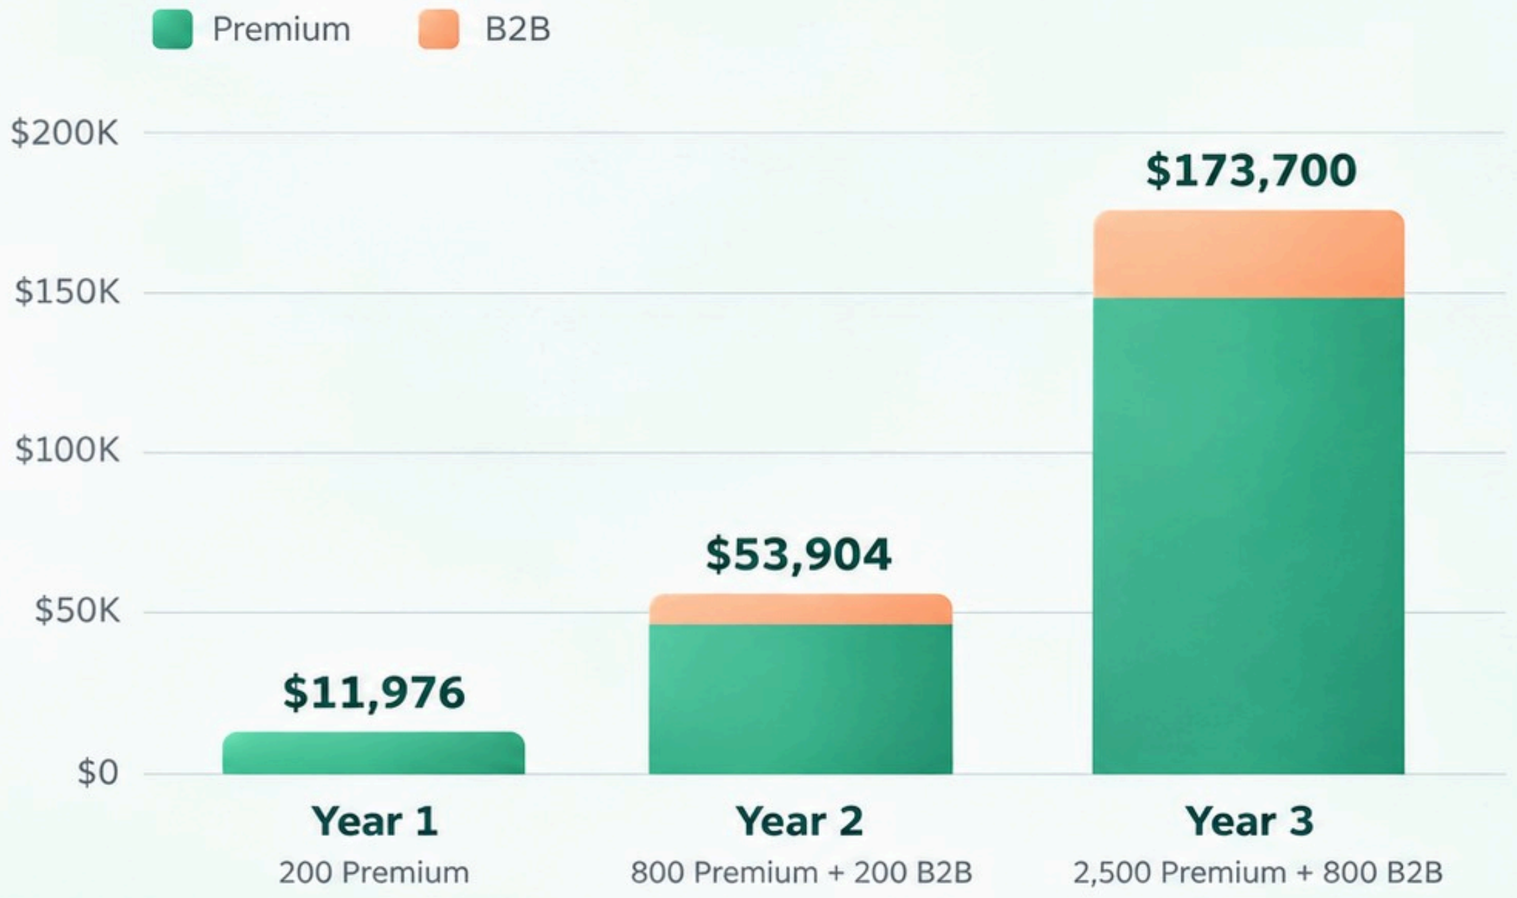
Cost Structure

- AI and cloud infrastructure
- Integrations
- Cybersecurity
- Technical support
- Marketing and pilots

Revenue Streams

- Free: $0
- Premium: $4.99/month
- B2B: ~$2.50/user/month
- B2B2C: Pharmacies
- Commission (future)

Revenue Forecast



PREMIUM

$4.99 × subscriber × 12

200 → 800 → 2,500

B2B

$2.50 × user × 12

0 → 200 → 800

GROWTH

Year 1 → Year 2: 4.5×

Year 2 → Year 3: 3.2×

Forecast only, not actual sales.

Costs and commissions are not included.

Revenue Forecast

From prototype to national scale

Q4 2026

MVP

Build and test the prototype.

Q1 2027

Premium Features

Add additional features.

Q2 2027

Pilot

Run a pilot with pharmacies and care centers.

Q3 2027

Launch

Commercial launch (B2C) and initial partnerships (B2B).

Q4 2027

Expansion

Scale to more pharmacies, hospitals and care institutions.

Cybersecurity & Data Protection

Encryption
Protects personal data with end-to-end encryption (AES-256).

Firewall & WAF
Blocks cyberattacks and unauthorized access.

Secure Authentication
Biometric login (Face ID / Fingerprint) and secure session control.

AI Safety (Guardrails)
Prevents unsafe or unauthorized actions by the AI agent.

Threat Detection
Monitors suspicious activity and potential fraud in real time.

Access Control
Role-based, limited access to sensitive information.

Your data is protected. Your control always stays with you.
